UNIVERSITÀ DEGLI STUDI DI MILANO

The University of Milan expands the curricula of its IT infrastructure with Syneto

Overview

Company: University of Milan
Location: Italy

The Challenge

- consolidate IT
- virtualize existing servers
- achieve Disaster Recovery

The Solution

- **IT consolidation** on a single Syneto solution
- **Easy Virtualization** thanks to VMWare integration
- fast and reliable **Disaster Recovery**

Customer Profile

The University of Milan is a public teaching and research university, which - with 31 departments and a teaching staff of 2000 professors - is distinguished by its wide variety of disciplinary fields. A leading institute in Italy and Europe for scientific productivity, the University of Milan is the largest university in the region

The Challenge

The University of Milan was facing the challenge of adapting to the growth in popularity of cloud storage. Various users of the University's' data were using unsafe and uncontrolled public cloud storage platforms. That is why the Informations Systems division was searching for an efficient private cloud solution that could provide heterogeneous data access.

The University also had to ensure the protection of its data, as well as a reliable Disaster Recovery solution. The new solution had to replace the existing one while cutting down costs and management times.

The Solution

The University used the unique features of Syneto products to create their own Private Cloud. The solution delivers easy and controlled access to data for all the Universities' users. It is designed from the start for easy data sharing.
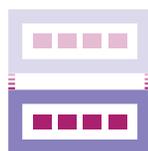

The Syneto solution chosen by The University of Milan is devised to provide smart disaster recovery with a low TCO. The solution takes automatic incremental backups of the data, ensuring complete data protection. The data can easily be recovered, should the IT infrastructure suffer from a disaster.

Syneto's solution maintains an easy to understand management layer which does not require large amounts of time for maintenance, freeing IT people for other tasks. The creation of backups for Disaster Recovery purposes, as well as other tasks, can be configured to take place automatically.

"The new Syneto solution is proving more than up to the task. From a management standpoint it is simple to use and flexible. Syneto technical support is proactive and very competent. "

- **Laura Colombo** - Information Systems Division, University of Milan

IT Consolidation

with an infrastructure that is easy to manage and provides virtualisation.

Virtualization

and easy VM management through effective VMWare integration.

Disaster Recovery

All data can be recovered within minutes in case of a downtime incident.
