

Power transformers manufacturer OCREV powers up its IT with a Syneto solution

Overview

Company: OCREV

Location: Italy

The Challenge

- consolidate IT infrastructure;
- achieve fast Disaster Recovery;
- implement a solution that is easy to manage.

The Solution

- IT consolidation with a single solution;
- fast and efficient Disaster Recovery;
- Ease of use with one-click management.

Customer Profile

OCREV, founded in 1922, is one of the world's best-known manufacturers of electrical power and distribution transformers. It currently has around 50 employees and operates in 3 plants.

The company's manufacturing process is customised for various kinds of transformers, based on customers' specific needs. The customers are active in various industries - from energy production plants to mines and refining plants.

The Challenge

OCREV was facing the challenge of having to consolidate its IT infrastructure and find a solution that would efficiently run all of the company's 6 VMs. As the company's previous solution had had stability issues, it needed a stable and reliable solution.

At the same time, the company had to ensure that its data is safely and efficiently backed up, but also easily recovered in case of a downtime incident. This recovery should also happen fast, saving the company unnecessary losses of time and money.

OCREV's previous infrastructure consisted of 2 servers running the 6 main VMs and this added some complexity to IT management. A solution that would be easier to manage was desired.

The Solution

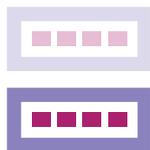

OCREV has chosen a new Syneto solution, as it met all the company's needs at a fair price. The solution now handles all the company's data – domain controller, email database, files, company software, etc.

The company has chosen a solution consisting of a HYPERSeries unit and a Syneto VA running on an existing server. This deployment helped cover all the organisation's performance needs

while ensuring fast and reliable Disaster Recovery.

The Syneto SereniTy proactive support service has also brought security and stability to IT operations, as the IT team can worry less about potential hardware failures. As many management operations can be done in just one click, the solution offers easy management, further saving the team time and effort.

"Syneto was able to provide us with an advanced solution that met all our requirements, at a fair price. With this solution, the company's applications now run optimally." - **Pietro Tovo** - Vice President, OCREV

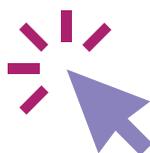

IT consolidation

With an all-in-one solution that offers all the necessary services.

Certain Disaster Recovery

The infrastructure can be "up and running" within 15 minutes after a disaster occurs.

One-click management

Apps can be deployed, backed-up, restored, and recovered with just one click.
